DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to the method and apparatus for generating video sync signals in a data recording medium player. Each independent claim identifies the uniquely distinct features "generating a dummy video sync signal when there is only an audio signal and no video signal included in the reproduced signal," and "the dummy video sync signal has a same frequency as a sync signal frequency of a general video signal such that output device displays an image corresponding to the dummy video sync signal having the same frequency as the sync signal frequency of the general video signal and outputs the audio signal via a speaker associated with the output device." The closest prior art, Heo (US 6,222,983 B1) and Okura (5,926,602), disclose a sync signal generating device, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
